Public Service and ATV

Often, we read and hear about the Public Service work that ATV'ers in Indiana and California provide for parades, etc. Plenty of opportunity exists for public service work with ATV here in Central Ohio. The local ARES supports many such functions every year. A few of these functions appear to be a good fit for ATV.

A good example is coming up the weekend of June 25, 26, and 27. The Special Olympics is being held at the Ohio State University, spread over a large part of the campus.

The Olympic officials would like to be able to "see" how certain events are progressing without running around all over campus, and being "out of touch" when they are really needed. The events take place both indoors and outdoors. Most locations have 60HZ power available, so complete 12V operation is not required from all stations.

If anyone is interested in supporting this or future public service activities, please contact Ken, WABRUT. If we support the Special Olympics, it will be only Sunday June 27 because of the ATV meeting on Saturday.

Well... I Can Dream, Can't I?
